Customer Feedback / Comments:

"ZoneAlarm Antivirus is a solid product, way better than the buggy and insecure Norton/Symantec Antivirus. ZoneAlarm AV installs smoothly and appears to work silently protecting your PC from virus (but not sinister spyware)." — Actual Consumer Comments from Amazon[dot]com

"The antiviral component is well-integrated and works in the same manner. ZoneLabs has excellent help and support...I would wholly recommend this to anyone without sufficient defenses..." — Actual Consumer Comments from Amazon[dot]com

"This product is a very simple to use, extremely efficient tool. I am very pleased with results it produced for me." — Actual Consumer Comments from Amazon[dot]com

*"Every time...*every* time you connect to the internet or go to a site it will come up with a popup asking you to allow or deny access. Gets very annoying after a while." — Actual Consumer Comments from Amazon[dot]com*
